

PROGENY VANTAGE® C

THE FUTURE OF DIGITAL
PANORAMIC AND
CEPHALOMETRIC
IMAGING

Exceptional features. Exceptional flexibility.

The Progeny Vantage® C is designed to meet your practice needs. Progeny Vantage® C is available with two sensors - panoramic and cephalometric - for optimal examination efficiency, or with one sensor when the clinic requires occasional cephalometric exams. Purchase a Progeny Vantage® Digital Panoramic System knowing that you can add the cephalometric option in the future.

Exceptional Imaging

- Full feature panoramic system with five pre-programmed panoramic techniques including pediatric, bitewing and TMJ exams
- The most widely used cephalometric views - lateral, AP, PA
- Detailed, high-quality images combined with unique soft tissue filtering delivers superior patient profile definition
- User-selectable field sizes confine the area of exposure to best fit patient examination requirements
- Slit Scan Collimation reduces scatter radiation improving image visualization

Exceptional Features

- Intuitive control with VantageTouch®, your touch-screen control for Vantage C. The cephalostat position is automatically transmitted to the VantageTouch® allowing for a streamlined workflow. Tap the screen to select the patient size and technique factors. Preview images on VantageTouch® immediately after acquisition for instant evaluation.
- Positioning tools include three lasers, temple wands, chin block and bite guide for panoramic. Easy-to-use cephalostat, ear posts and nasion positioner for ceph ensure accurate, repeatable positioning.
- Includes VantageTrustSM - Midmark's exclusive remote training and positioning assistance. VantageTrustSM offers prompt feedback for improved patient care.
- Cephalometric attachment is field configurable for right or left side.
- Compact design minimizes space requirements.

Exceptional Value

- TWAIN included
- Progeny® Imaging Software with DICOM included
- Award-winning, elegant design and workflow features
- Technology-driven simplicity
- Manufactured in the U.S.A. 

Unique VantageTouch® Interactive User Control

Superior soft tissue visualization

Open design for comfort of patient
